SUMMARY

WordPress developer with 4+ years of experience building responsive, SEO-optimised websites using Elementor, custom plugin development, HTML, CSS, and JavaScript, plus 2 years applying UI/UX principles with Figma and Adobe XD, and hands-on full-stack development experience with JavaScript, Node.js, and Next.js. Proven track record of delivering measurable improvements in efficiency, load times, and user experience.

SKILLS

Languages/Frameworks: WordPress, HTML, CSS, JavaScript, Express.js, MySQL, Node.js, Next.js, EJS, PHP

Front-End & UI/UX: Responsive Web Design, Mobile-First Development, Figma-to-Code, Elementor, Cross-Browser Compatibility, Accessibility, Wireframing & Prototyping

Tools: Git, Docker CE, GitHub, Postman, Figma, Adobe XD, Microsoft Office Suite, Claude Code, Prisma ORM

IDE: VS Code, Visual Studio, Cursor, Antigravity

EDUCATION

Bachelor of Engineering in Computer Engineering (GPA: 4.06/5)

Feb 2019 – Feb 2025

Federal University of Technology Minna, Nigeria

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management, Computer Networks, and Protocols.

EXPERIENCE

Web Developer

July 2025 – May 2026

TechVibes International Ltd — Abuja, Nigeria

- Developed a full-stack POS system serving 200+ students and staff, reducing payment processing time by 60% and cutting transaction errors by an estimated 40%, using Next.js with Prisma ORM and a MySQL database.
- Built 3+ custom WordPress websites using Elementor, CSS, and JavaScript, improving average page load speed by 30% through optimised assets and responsive, mobile-first layouts, while collaborating with design, product, and R&D; teams to deliver client visions.
- Built a custom WordPress plugin using PHP to extend Elementor's mega menu functionality, reducing manual navigation editing time by an estimated 70% and enabling consistent UI across 10+ site pages.

Web Developer

Feb 2025 – June 2025

Link Building Blogs Agency — Remote, USA

- Collaborated with a 5-person web development team to bring Figma and Adobe XD designs to life as responsive, pixel-accurate front-end builds.
- Utilised AI tools (Claude, Cursor) to streamline and accelerate the development process, resulting in a 150% increase in delivery efficiency without compromising code quality.
- Liaised with cross-functional teams across time zones to deploy 3+ website updates and feature releases efficiently within agreed deadlines.
- Performed website updates and front-end maintenance across multiple client sites, improving cross-browser consistency and reducing reported bugs by an estimated 25%.

WordPress Developer

Sep 2023 – March 2024

TechVibes International Ltd — Abuja, Nigeria

- Oversaw the development of 3 WordPress sites using Bitnami on Amazon AWS Cloud for in-house and outsourced clients, achieving 100% on-time delivery across all projects.
- Worked with the on-site server team on a full site migration to company-hosted servers, achieving zero data loss and less than 1 hour of downtime across all 3 sites.

PROJECTS

Published Academic Research Paper

April 2026

International Computing Conference (EAI) — Dar es Salaam, Tanzania

- Co-authored undergraduate research paper titled "An Improved Fire Detection and Classification System," accepted and published at EAI International Computing Conference (DOI: 10.1007/978-3-032-16635-7_21).
- Designed an AI/ML-based system using computer vision and multi-sensor data to detect and classify fire types with high accuracy, with a physical implementation now housed at the Federal University of Technology, Minna.
